

Reaching

GREAT HEIGHTS

together!

Top of the World Challenge!

We can all reach great heights both individually and go further still together. How many of the world's 100 tallest mountains can we climb as one Trust community?

During these challenging times it's important that we all look after our mental wellbeing and walking is a great way to do this, alongside also improving our physical health.

We're encouraging children to walk locally with their parents (within the restrictions of lockdown) and measure how far they walk. They can then colour or tick off any mountain of their choice below and share this with their teacher via Seesaw.

Each child could walk far enough to climb several mountains over the next few weeks. What could a class, a Key Stage or a school achieve together?

All school and other Trust staff have the opportunity to join in too. How high can everyone in the Trust go?

There's no limit to what we can achieve together!

We are going to use this challenge to fundraise for the mental health charity MIND.
